Information regarding COVID Summer School 2022 in Switzerland

In preparation for our summer session in Switzerland, we are requesting that all students be vaccinated for Covid before their arrival in Saas-Fee.

The EGS requests this for two reasons. First, and primarily, we would like to assure that all students and faculty feel safe and comfortable during their stay in Saas-Fee. Second, we think it would be prudent for students to prepare to meet national (Swiss) standards at the time of the session. These standards fluctuate frequently, and we believe it would be best to be prepared for changes. The EGS will not be able to oversee vaccination status in the weeks preceding the session and we would not want students to be taken by surprise should Swiss law shift at a last minute.

During the session, students and faculty may wear masks if they wish to do so.

As in all previous years, everyone is instructed to make sure that they have insurance, travel cancellation insurance, and health insurance. Please confirm this at your registration, as the EGS cannot be held liable or make refunds for course cancellations or non-attendance due to medical conditions or overriding legal regulations.
